Professional Summary

Results-driven Full Stack Developer with hands-on experience in designing and deploying scalable web applications using JavaScript, React.js, Node.js, and RESTful APIs. Skilled in delivering high-performance, user-centric solutions, optimizing system performance, ensuring application security, and leveraging cloud platforms (Azure, GCP) to build modern solutions.

Technical Skills

- **Languages/Frameworks:** JavaScript (ES6+), HTML, CSS, React.js, Node.js, NestJS
- **Databases:** MongoDB, PostgreSQL
- **Testing Tools:** Jest, Postman, API Testing
- **Cloud/Tools:** Microsoft Azure, GCP, Git, RESTful APIs, GraphQL
- **Generative AI:** ChatGPT, Claude, Gemini, Prompt Engineering, LLM APIs

Work Experience

Konnectify Labs Pvt Ltd, Chennai

Full Stack Developer

June 2024 – Present

- **Engineered** and maintained scalable web applications using Next.js for the frontend and NestJS for backend services.
- **Implemented** secure, high-performance backend APIs in NestJS, handling authentication, RBAC, and data validation.
- **Deployed** full-stack applications on Google Cloud Platform using Cloud Run, Cloud Functions, and Cloud Build (CI/CD).
- **Performed** code reviews, unit testing, and documentation to maintain consistency and code quality.
- **Used LLMs** to generate structured configurations (triggers, actions, filters) from natural language inputs.
- **Improved** developer productivity by leveraging AI for API design suggestions, debugging, and optimization.

Projects

Konnectify – No-Code Automation Platform

Stack: React, Next.js, NestJS, REST APIs, GCP

- **Developed** Konnectify's workflow builder UI with triggers, actions, filters, and execution logs in Next.js.
- **Constructed** the workflow engine APIs in NestJS enabling runs, retries, parallel paths, and error handling.
- **Enhanced** execution performance using optimized SQL queries, caching, and GCP services.

SyncIt CRM Application

Stack: React, Node.js, MongoDB, REST APIs

- **Built** the SyncIt CRM application using React, Node.js, and MongoDB with responsive, user-friendly interfaces.
- **Developed and integrated** Contact, Company, and Opportunity modules with CRUD operations and REST API connectivity.
- **Established** secure login and registration functionality with authentication and validation features.
- **Embedded** Generative AI features to streamline CRM workflows and enhance user productivity through intelligent automation.
- **Optimized** application performance through streamlined REST API architecture and efficient MongoDB query management.

Chat App – Nightingale

Stack: React.js, Node.js, Socket.IO, MongoDB

- **Created** a real-time chat application using React.js, Node.js, Socket.IO, and MongoDB for seamless user communication.
- **Configured** user authentication and search functionality allowing users to find and connect with registered friends.
- **Integrated** real-time messaging features with Socket.IO to enable instant message delivery and live communication.
- **Designed** responsive chat interfaces and managed message storage and retrieval using MongoDB.
- **Boosted** real-time performance and scalability by streamlining Socket.IO event handling and MongoDB query efficiency.

Stack Overflow Clone

Stack: React.js, Node.js, Express.js, MongoDB, Redux, Nodemailer

- **Built** a Stack Overflow Clone application using React.js, Node.js, Express.js, and MongoDB with dynamic and responsive user interfaces.
- **Architected** a comprehensive database schema for managing questions, answers, and user profiles with efficient data retrieval.
- **Implemented** voting functionality enabling users to upvote and downvote questions and answers based on content relevance and popularity.
- **Applied** Redux for efficient state management and seamless user experience across the application.
- **Added** authentication and email notification features using Nodemailer to enhance user engagement and account management.

Movie Booking Web App

Stack: React, Node.js, Express, MongoDB, Material UI

- **Launched** a full-stack movie booking platform with schedule browsing and secure ticket reservations.
- **Secured** JWT authentication and responsive UI using Material UI.
- **Designed** CRUD operations for movies, users, and bookings.

QR Generator

Stack: React.js

- **Assembled** a QR Generator application using React.js with a simple and responsive user interface.
- **Added** dynamic QR code generation functionality based on user-provided text and URLs.
- **Crafted** reusable React components to ensure smooth user interaction and maintainable code structure.
- **Enhanced** user experience with real-time QR preview and efficient state management.

Education

Karpagam Institute of Technology, Coimbatore	2014 – 2018
B.E. Mech - (6.9/10)	
Government Higher Secondary School, Thevaram	2012 – 2014
HSC (Biomaths) - 81%	

Certification

Full Stack Development Course – GUVI Geeks Technology	Jan 2023 – May 2023
---	---------------------
